

M. Manish Kumar

Full Stack Web Developer (MERN Stack)

Bengaluru, India | kumarmmanish434@gmail.com | +91-7846970385 | linkedin.com/in/m-manish-kumar |
github.com/mmanishkumar111

PROFESSIONAL SUMMARY

Results-driven Full Stack Web Developer with hands-on experience building MERN stack applications. Proficient in React.js, Node.js, Express.js, MongoDB, and RESTful API design. Experienced with JWT-based authentication, responsive UI/UX using Tailwind CSS and Bootstrap 5, and Git-based version control. Familiar with TypeScript fundamentals. Passionate about writing clean, maintainable code that solves real-world problems.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), TypeScript (basic), React.js, Redux (basic), Tailwind CSS, Bootstrap 5

Backend: Node.js, Express.js, REST API Development, JWT Authentication

Database: MongoDB (Mongoose ODM), SQL (basics), CRUD Operations

Testing: Postman (API testing)

Tools: VS Code, MongoDB Compass, npm

Concepts: Responsive Design, MVC Architecture, CRUD Operations, Object-Oriented Programming (OOP), DOM Manipulation

SOFT SKILLS :

- Quick Learner
- Team Collaboration
- Attention to Detail
- Leadership
- Decision Making

EXPERIENCE & TRAINING

Full Stack Web Development Trainee

JSpider Training Institute, Bengaluru | Jan 2025 – Sep 2025

- Completed 800+ hours of intensive full-stack training covering the MERN ecosystem (MongoDB, Express.js, React.js, Node.js), reinforced through daily mock tests, coding exercises, and technical presentations.
- Developed and structured backend servers using Node.js and Express.js, implementing RESTful API architecture with proper routing, middleware integration, and error handling across multiple projects.
- Designed and managed MongoDB databases for multiple applications, writing queries, structuring collections, and handling data relationships for real-world use cases, including student records and user management.
- Built dynamic and responsive frontend interfaces using React.js, working with components, props, state management, hooks, and React Router for navigation across single-page applications.
- Tested and validated 20+ REST API endpoints using Postman — covering GET, POST, PUT, and DELETE operations — ensuring request/response accuracy, authentication flow, and error handling reliability.
- Developed a fully functional Student Portal as a capstone project — implemented JWT-based user authentication, built as a Single Page Application (SPA) for seamless navigation, and designed to support learning management and classwise student registration.

- Connected frontend and backend layers end-to-end, handling API calls from React to Express servers and managing data flow between UI and MongoDB collections.

PROJECTS

Student Portal Application | MERN Project — JSpiders

(React · Node.js · Express · MongoDB)

- Built a comprehensive student management web application with user authentication, profile management, course enrollment, and grade tracking features.
- Implemented a JWT-based authentication system with secure token handling, input validation, and error management on both frontend and backend.
- Designed a scalable REST API backend using Node.js and Express, with MongoDB for storing student profiles, courses, and grades with optimized database queries.
- Created a responsive React frontend using component-based architecture and Tailwind CSS, featuring user registration, login, profile management, and course enrollment.

E-Book Store | Academic Group Project — B.Tech Final Year

(Java · JSP · MVC · Apache Tomcat · MySQL · HTML · CSS · JavaScript · React)

- Contributed to a full-stack e-book store application built as a group project, handling the UI design and form validation modules within a Java-based MVC architecture.
- Developed and styled frontend pages using HTML, CSS, and JavaScript, and implemented client-side form validation for user registration, login, and book submission flows.
- Worked within a JSP and Apache Tomcat environment, understanding how server-rendered pages integrate with Java backend logic and MySQL database operations.
- Collaborated with teammates on end-to-end delivery — from database design in MySQL to deploying and testing the application on a local Tomcat server.

EDUCATION

Bachelor of Technology — Computer Science & Engineering

Modern Engineering & Management Studies, Balasore, Odisha | Graduated 2025 | CGPA: 8.04 / 10 (76.38%)

Higher Secondary (Class XII)

B.C.E.T Higher Secondary High School, Balasore, Odisha | 2021 | 62%

CERTIFICATIONS

- **Full Stack Web Development** — JSpider Bangalore (2025)
- **JavaScript Fundamentals** — JSpider Bangalore
- **React.js Development Basics** — JSpider Bangalore
- **Postman API Fundamentals** — Postman (In Progress)
- **Frontend Development** — CodeAlpha
- **TypeScript** — Simplilearn
